

IDROBENNE®

The grab expert.

SINCE 1994

Profilo aziendale

La Idrobenne progetta, produce e commercializza accessori idraulici di presa per gru da camion ed escavatori idraulici. Presente sul mercato col proprio marchio dai primi anni '90, l'impresa oggi collabora con i più prestigiosi marchi di gru idrauliche e di escavatori, forte della sua indipendenza e dell'esperienza maturata nella propria nicchia di mercato. La Idrobenne può essere considerata un vero "Grab expert", capace di suggerire la migliore risposta alle più diverse esigenze di movimentazione.

La Sede

L'azienda è situata a Isorella, in provincia di Brescia, in un distretto industriale tra i più famosi d'Europa per la produzione metalmeccanica e siderurgica. La Idrobenne ha operato una precisa scelta di qualità e di radicamento nel tessuto produttivo italiano. Per questo non delocalizza la produzione di nessun componente. Tutte le lavorazioni sono effettuate all'interno del proprio stabilimento, al fine di avere un controllo di qualità immediato e costante.

I clienti

La Idrobenne esporta direttamente i propri prodotti in più di 40 Paesi. La missione aziendale è di fornire prodotti tecnologicamente avanzati e affidabili ad una clientela professionale. Per questo il nome Idrobenne è riconosciuto come un marchio di qualità.

I fornitori

I maggiori fornitori della Idrobenne sono selezionatissimi e legati da un rapporto di collaborazione aperto e costruttivo che dura da oltre un decennio. E' infatti innegabile che sia necessario investire nelle fonti di approvvigionamento per offrire un prodotto di alta qualità. I fornitori Idrobenne sono considerati i primi *partners* dell'azienda. I più importanti hanno sede in Italia settentrionale, in Germania e in Svezia.

Company profile

Idrobenne has been manufacturing quality hydraulic grapples for truck cranes and excavators since the early Nineties. Company's own experienced staff carries out all design, engineering, production and final testing. The Company is totally independent from any crane and excavator manufacturer. These factors have helped Idrobenne gain recognition as a leading "Grab expert" throughout the truck crane and excavator attachment industry.

The headquarters.

The Company is located in Northern Italy, near Brescia, where some of the most important European steel companies were born. To ensure highest quality standards, Idrobenne manufactures every component internally, where trained personnel monitor each process. State-of-the-art computer engineering software combines with the most advanced processing machinery for precision parts, in a clean and friendly working environment.

Customers.

Idrobenne deals directly with more than 40 Countries all over the world. Company mission is to supply good quality products to professional and demanding clients. Idrobenne cares about the reliability of its products even in the worst working conditions.

Supplier's policy.

Idrobenne believes suppliers are key partners to its production of quality and innovative products. All main suppliers have been through a long selection process, but now they work as a team with the Company and share the same mission. Some raw materials and components are imported from Germany and Sweden.

Qualità

Per ottenere un prodotto di elevata qualità, l'intero processo costruttivo deve lavorare al meglio. In altre parole, la qualità finale di un prodotto è funzione del livello di qualità di ogni singolo processo che porta al risultato finale.

I nostri punti di forza:

- Software di progettazione e disegno tridimensionale di ultima generazione, costantemente aggiornato
- Sistema di prototipazione virtuale con analisi degli stress e dei fenomeni di fatica
- Materiali di costruzione selezionati e certificati all'origine
- Componentistica di qualità superiore, di produzione esclusivamente europea
- Sistemi oleodinamici provenienti esclusivamente da fornitori certificati ISO 9001
- Personale di grande esperienza qualificato secondo gli standard professionali AWS per le lavorazioni speciali
- Consulenti commerciali disponibili e tecnicamente preparati
- Accurato controllo dei processi
- Documentazione di prodotto completa e aggiornata
- Severo collaudo di tutti i prodotti prima della spedizione
- Controllo di gestione e monitoraggio continuo della soddisfazione dei clienti

ISO 9001:2015

Il sistema di qualità Idrobenne è certificato ai sensi della normativa ISO 9001:2015 per la progettazione, costruzione, commercializzazione, assistenza di polipi ed attrezzature idrauliche per escavatori e gru da camion.

Il processo industriale è quindi organizzato, condotto e controllato in ogni sua fase: dall'ideazione del prodotto alla realizzazione dei diversi componenti che lo costituiscono fino alla verifica della sua perfetta funzionalità.

Quality

It is widely acknowledged that proper quality management improves business, often having a positive effect on investment, market share, sales growth, sales margins, competitive advantage, and avoidance of litigation.

Strengths

- *State of the art, constantly updated 3D drawing software*
- *3D virtual prototype system, to simulate the reactions of new equipment to the most various working conditions*
- *Carefully selected and certified materials*
- *High quality components, all strictly made in Europe.*
- *Top quality hydraulic components, coming from certified suppliers only*
- *Highly trained workers, kept constantly updated by welding and mechanics courses, AWS certified for metal assembly and constructions*
- *Customer oriented, very professional commercial staff*
- *Step by step process controlling*
- *Accurate product documentation and user friendly operating manuals*
- *Severe product testing before shipping*
- *Constantly updated customers' satisfaction reports*

ISO 9001:2015

Idrobenne is ISO 9001:2015 certified in design, construction, commercialisation, servicing of hydraulic grabs and equipment for excavators and truck cranes.

Industrial process is organized, managed and verified at any stage: from product design, to component assembly, to the severe performance testing

Our qualified workers are regularly trained to the newest welding, assembly and testing techniques. Incoming materials and components are regularly checked.

Le maestranze qualificate partecipano regolarmente a corsi di aggiornamento sulle tecniche di saldatura, assemblaggio e collaudo, sulle lavorazioni meccaniche di precisione, sul controllo della qualità in ingresso ed in uscita dal proprio reparto.

È stato avviato, strutturato e incoraggiato il sistema per il miglioramento continuo di processo e prodotto.

Sostenibilità

Per Idrobenne, sostenibilità significa condurre l'attività col massimo rispetto verso la comunità in cui si opera, adottare nuove tecnologie per ridurre l'impronta ambientale e considerare l'impresa come parte di un sistema più ampio, che trascende gli aspetti prettamente economici. Il mondo attuale presenta sfide molto complesse, che vanno dalla globalizzazione dell'economia ai cambiamenti climatici, all'esigenza di maggiore equità sociale.

La nostra natura di impresa familiare ci porta a fare del nostro meglio per garantire un futuro alle nuove generazioni. Siamo convinti che la sicurezza economica non possa essere costruita a spese del pianeta. Non può esistere etica di impresa senza giustizia sociale.

Queste sono alcune tappe in cui si snoda il nostro percorso:

1. Energia solare dal 2007

Idrobenne è stata tra le prime aziende italiane a credere nel fotovoltaico. Oggi ha una potenza installata di 185 kW.

2. 100% energia da fonti rinnovabili

Dal 2020 tutta l'energia elettrica impiegata nel ciclo produttivo della Idrobenne viene certificata come proveniente da fonti rinnovabili.

3. La foresta di Idrobenne

Idrobenne ha scelto di piantare alberi per contrastare il riscaldamento globale e i cambiamenti climatici. Gli alberi vengono gestiti da Treedom, una piattaforma che si occupa della piantumazione e della geolocalizzazione delle piante, in modo che ogni cliente possa tracciare l'albero che ha ricevuto in dono. Gli alberi vengono poi affidati a contadini che si trovano spesso in paesi in via di sviluppo. Questi, oltre a prendersi cura delle piante, ne raccolgono i frutti, in modo da contribuire al sostentamento delle comunità locali.

Nel corso degli anni, con l'aiuto dei propri clienti, Idrobenne conta di dar vita ad una vera e propria foresta, che chiunque può esplorare collegandosi al nostro sito web

<https://www.idrobenne.com/it/sostenibilita>

Step by step process improvement is promoted and rewarded at any level.

Sustainability

For Idrobenne, sustainability means making business with the utmost respect for the community in which we operate. We adopt new technologies to reduce the environmental footprint and we consider our company as part of a broader system, which transcends purely economic aspects. Modern world face us to very complex challenges, ranging from the globalization of the economy to climate change, to the need for greater social equity.

Our nature as a family business leads us to do our best to guarantee a future for the new generations. We are convinced that economic security cannot be built at the expense of the planet. There can be no business ethics without social justice.

These are some of the stages in which our journey unfolds:

1. Solar power since 2007

Idrobenne was among the first Italian companies to believe in solar power. Today we have 3 powerplants for a total of 150 kW.

2. 100% energy from renewable sources

From year 2020, all the electricity used by Idrobenne in the production cycle officially comes from renewable sources.

3. Idrobenne's own forest

Idrobenne chose to plant trees to withstand global warming and climate change. The trees are managed by Treedom, a platform that deals with the planting and geolocation of plants, so that each customer can trace and monitor the trees he received as a gift.

The trees are then entrusted to farmers who often live in developing countries. These people, in addition to taking care of the plants, collect the fruits, in order to contribute to the sustenance of local communities. More info on <https://www.idrobenne.com/sustainability>

Orange peel grabs

- Compact 6-7
- Heavy duty compact 8-9
- With vertical cylinders 10
- Heavy duty with vertical cylinders 11

Sorting and demolition grapples 12-13

Clamshell buckets

- With horizontal cylinders 14-17
- With vertical cylinders 18-19

Log grapples 20-21

Multi-purpose forestry grapples 22-24

Kerb stone grabs 25

Pallet forks 26

Wallboard forks 27

Railway equipment

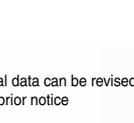

- Grabs for sleepers 28
- Grabs for rails 29
- Propping grab 30

Orange peel grapples for rocks 31

Alligator crusher 32

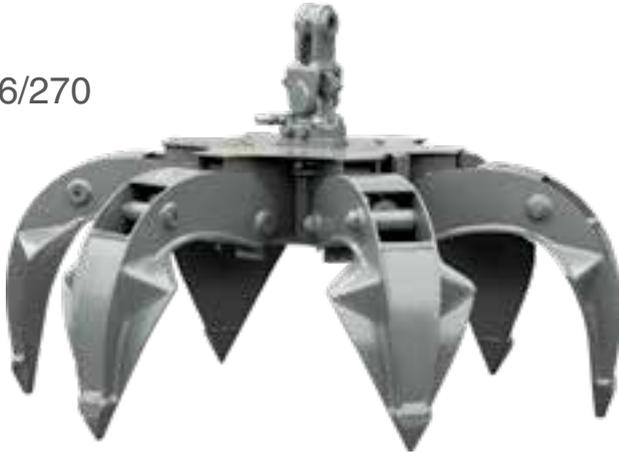

Hydraulic rotators 33

Cross-reference listing grapple / operating machine 34

Compact orange peel grab for metal scrap and loose materials.

- Long-lasting design and constant improvements in building materials grant reliability and lifespan.
- Compact and sturdy design, generous load capacity.
- The hydraulic circuit is perfectly protected into the structure.
- Incorporated hydraulic or mechanical rotation.
- Jaws are made of HB 400 wear-resistant steel, tips are forged.

Technical Data

Orange peel grab for foldable truck cranes

- The asymmetric design of the tines allows this 6 tines grapple to remain folded on “Z cranes” without exceeding the truck’s overall dimensions.

Technical Data

Accessories

Adapter Bolt-on adapter for rigid mounting on excavator's arm

3 versions available:

- “Demolition”, with metal ribs
- “Sorting”, with perforated arms
- “Universal”, with closed arms and teeth

3 versions available: Sorting, Demolition, Universal

SORTING:

- Perforated arms
- Bolt-on counterblades

Suggested applications: precise sorting of materials

DEMOLITION:

- Arms with metal ribs
- Bolt-on counterblades

Suggested applications: light demolition and sorting

UNIVERSAL:

- Arms with closed bottom
- Sawtooth profile of jaws
- Counterblades with teeth (welded retainer and replaceable teeth)

Suggested applications: stone handling, building of dry stone walls, landscaping architecture.

Accessories

Plate	Bolt-on plate
Adapter	Bolt-on adapter for rigid mounting on excavator's arm
Adapter for QC	Bolt-on adapter for quick coupler
Grippers	Kit for handling bricks and curb stone

Clamshell bucket for agriculture and light duties

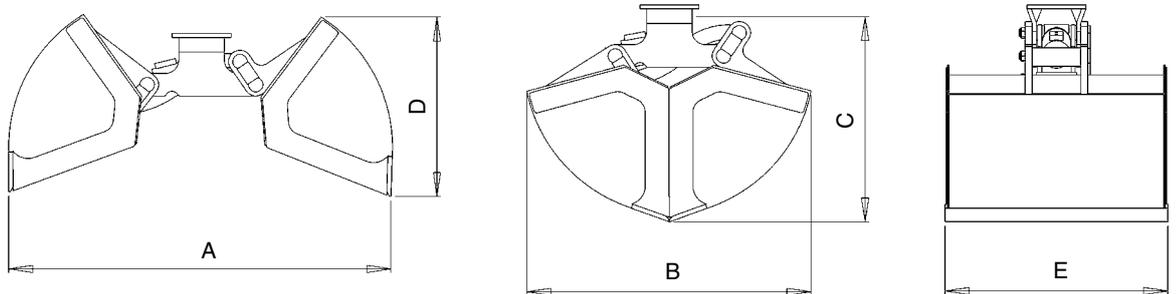

- Horizontal cylinder design grants reduced height
- Safety valve fitted as standard
- Alloy steel pins and hardened bushings are used in all junction points
- Cutting edges made of HB 400 wear-resistant steel

Accessories

Fixed head	Bolt-on head (without rotation)
GRM	Mechanical, free rotation (250°)
GRI	Hydraulic continuous rotator
Ejector	Scraper for mud
Teeth	Digging teeth, bolted
Top link for crane	Suspension link (cardanic) for truck crane
Top link for excavator	Suspension link (cardanic) for excavator

Clamshell bucket with horizontal cylinder for loading

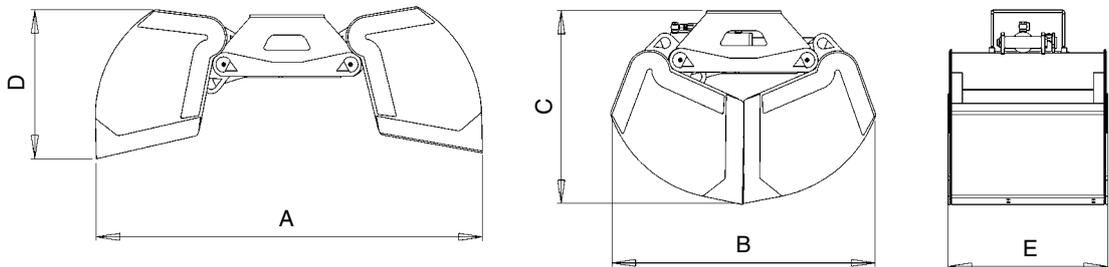

- Sturdy, reliable and compact design.
- Very good loading intake.
- Hydraulic or mechanical rotation available on demand.
- Cutting edges made of HB 400 wear-resistant steel

BMO - 400/L

Model	Cap. l.	Weight Kg	Max load daN	Max BAR	A mm	B mm	C mm	D mm	E mm

Technical Data

Accessories

Fixed head	Bolt-on head (without rotation)
GRM 4 T/F	Mechanical, free 250° rotation (without hydraulic supply)
GRI 4 T/SF	Hydraulic rotator
GRI 5 T/SF	Hydraulic rotator
Teeth	Digging teeth, bolted
Top link for crane	Cardan suspension link for truck crane
Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with two horizontal cylinders for loading

- Sturdy, reliable and compact design.
- Shape of the shells and high penetration force grant excellent loading capacity.
- Suitable for excavator up to 26 Ton.
- Cutting edges made of HB 400 wear-resistant steel, teeth available on demand.

Top link for excavator	Cardan suspension link for excavator

Clamshell bucket with two vertical cylinders, suitable for loading and digging

- Geometry of the 2 powerful cylinders grants huge penetration force.
- Robust construction makes it suitable for the most demanding applications.
- Suggested for excavator up to 32 Ton.
- Buckets made of HB 400 wear-resistant steel.
- Teeth available on demand.

Technical Data

Accessories	
Fixed head	Bolt-on head (without rotation)
GRM 10 T/F	Mechanical, free 250° rotation (without hydraulic supply)
GRI 10 T/P	Hydraulic rotator up to 500 lt.
GRI 20 T/P	Hydraulic rotator for 1000 lt. and over
Teeth	Digging teeth, bolted
Extension	Extensions up to 3 metres of length
Top link for excavator	Cardan suspension link for excavator

Light-type log grapple

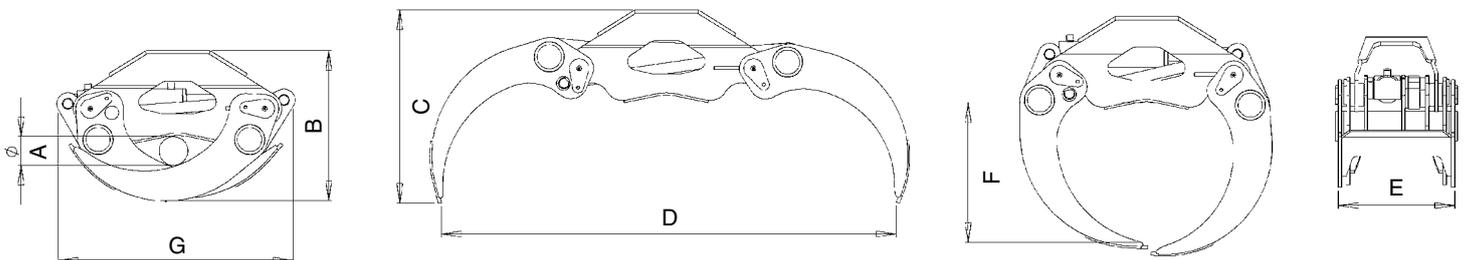

- Light grapple, suitable for not intense applications.
- Wide opening and very small gripping diameter when closed
- Safety valve is fitted as standard.
- Alloy steel pins and hardened bushings in all junctions.
- Entirely made of anti-yield DOMEX 690 steel.

PTO 150

Top link for excavator	Cardan suspension link for excavator

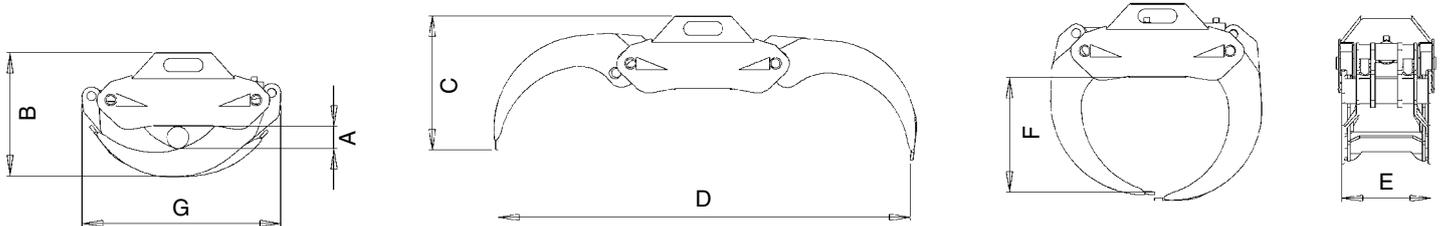

Professional log grapple

- Suitable for intense and industrial forestry applications.
- Wide opening with reduced overall dimensions when closed.
- Central cylinder and double compensation bar design gives a perfect balancing.
- Entirely made of DOMEX 690 and HB 400 steel.

Multipurpose grapple for rigid mounting

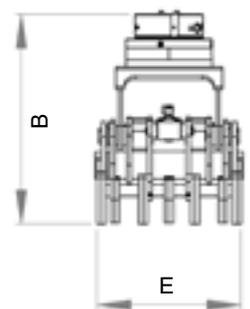

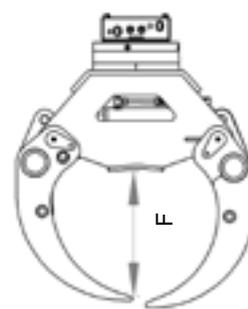

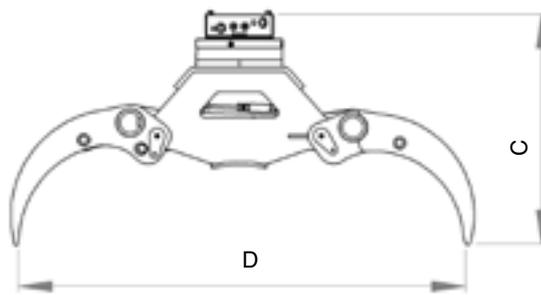

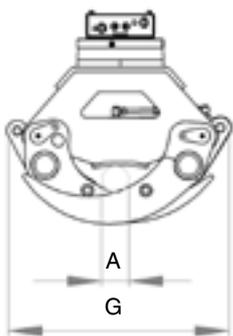

- High closing force; perfect balance due to the central cylinder design.
- Tines made of wear-resistant steel HB 400 and available in 2 versions, with 4 and 7 tips.
- Large opening and reduced overall dimensions when closed.
- Body made of high tensile steel, suitable to heavy-duty applications.

Accessories

- GRI Hydraulic continuous rotator 360°
- Adapter Bolt-on adapter for rigid mounting

Also available with:

4 tips:

4 tips and blade:

Multi purpose and forestry grab

- Very versatile grab with interlocking jaws.
- Vertical - double - cylinders geometry grants high gripping force.
- Sturdy and well-tested main frame, suitable for heavy-duty applications.
- Arms made in HARDOX 400 steel.

Kerb stone grab

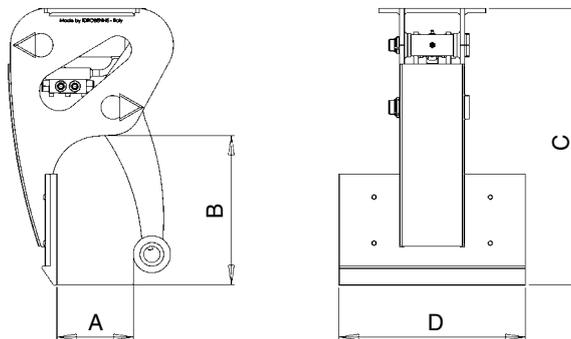

- Handles kerb stones in full security.
- Grabs the kerb directly from the pallet where it is packed.
- Compact, light and very reliable construction.
- Long-lasting nylon pad and plastic bumpers prevent from scratching.
- Kerb stones can be posed at once by the machine operator.

KSG-400

High quality alligator crusher for mini-excavators

- Allows indoors crushing with the smallest mini excavators.
- Hardox 400 frame grants long lifespan and high performance.
- Tungsten carbide replaceable teeth.
- Large diameter cylinder with guard.
- Entirely built and tested in house.
- Shears bars up to \varnothing 14 mm.
